

## RA7 Complex

Now, many of the same ingredients that fuel Reliv's powerful internal nutrition are available in a targeted topical form to repair, replenish and revitalize your skin.

With the RA7 Complex, Reliv has created an exclusive combination of potent antioxidants, anti-inflammatories and essential fatty acids that work synergistically to combat environmental damage, slow the aging process and nourish your skin at the cellular level.

- **Soy.** Antioxidant, reduces wrinkles and skin discoloration. Its anti-inflammatory properties can also reduce the redness caused by acne and sun exposure. Helps promote the synthesis of collagen and improves skin elasticity. Improves the skin's ability to retain moisture. Also improves the gloss and texture of hair, and improves manageability and body.
- **Pycnogenol®.** Antioxidant, improves skin health, boosts collagen renewal, improves skin elasticity, reduces wrinkles, helps promote healing, improves acne, and prevents UV damage. It also works as an anti-inflammatory to calm skin, and its anti-oxidant properties have been clinically shown to reduce hyperpigmentation caused by sun damage.
- **Omega 3.** Essential fatty acid, helps reduce inflammation and increase moisture for smoother, healthier looking skin. Omega 3 also is necessary for the proper functioning of cell membranes, and since the skin does not synthesize omega 3, supplementation is essential.
- **Co-Q10.** Antioxidant, and anti-inflammatory that boosts skin repair and regeneration, reduces free radical damage, helps fade age spots, and reduces fine lines and wrinkles. Sun exposure breaks down Co-Q10, making supplementation essential.
- **Alpha lipoic acid (ALA).** Antioxidant, helps prevent wrinkle formation and reduces the appearance of fine lines. Also effective in lightening age spots, improving the appearance of scars, and reducing the look of large pores.
- **Green tea.** Antioxidant, and anti-inflammatory that helps slow the aging process. Reduces oxidative stress caused by sun exposure. Helps moisturize, hydrate and protect skin.
- **Vitamin A.** Antioxidant, helps minimize appearance of fine lines and wrinkles, creating a more youthful appearance. Improves the cellular replacement rate of the skin. Also helps improve dry skin and acne.
